

Maximality versus telicity in Tlingit

Laurestine Bradford

Canadian Linguistic Association Conference
June 3, 2025
McGill University

Do these mean the same thing?

Do these mean the same thing?

(1) I'm done reading that book.

Do these mean the same thing?

- (1) I'm done reading that book.
- (2) I've read that book completely.

Do these mean the same thing?

- (1) I'm done reading that book.
- (2) I've read that book completely.
- (3) Yan xwaatóow wé x'úx'.

Do these mean the same thing?

(1) I'm done reading that book.

(2) I've read that book completely.

(3) Yan xwaatóow wé x'úx'.
CMPL= PFV.1SG.S.read that book

Do these mean the same thing?

(1) I'm **done** reading that book.

(2) I've read that book **completely**.

(3) **Yan** xwaatóow wé x'úx'.
CMPL= PFV.1SG.S.read that book

1. What's that *yan*?
2. *Yan* and *completely*: Maximizing scales
3. *Yan* and *done*: When you've had enough
4. Summary
5. Dessert: *Yan* and pluractionality

Tlingit (En: [kl'ɪŋ.kɪt], Tl: *Lingít* [ɬín'kít])

- ~100 fluent speakers as of 2018 (Twitchell, 2018).
- Revitalization efforts spread out among communities (Burge, 2024).

- (4) Loon awliyéx. Laax tsu awliyéx.
bark 3>3.PFV.make red.cedar also 3>3.PFV.make
“He carved bark. He carved red cedar.”
(Dauenhauer & Dauenhauer, 1987)
- (5) Woosh gunayáade át; daa sá yan wulihásh
RECIP different thing; what Q ground= PFV.drift
áwé alyéix.
FOC 3>3.IPFV.make
“Different kinds of material; whatever had drifted ashore is
what he carved.” (Dauenhauer & Dauenhauer, 1987)

Yan adds... culmination?

- (6) Yáat'aa x'úx' yeetóow, ch'a aan ku.a tlíl
this.one book PFV.2SG.S.read nonetheless however not
yan yitóow.

CMPL= PFV.2SG.S.read

"You were reading this book, but you never finished it."

(SJ)

Yan adds... telicity?

- (8) Tleinlí (# yan) x̣waatóow
almost (# CMPL=) PFV.1SG.S.read
wé x'úx'.
that book.
"I almost read that book. [But all the
same, I just put it back.]" (SJ)

- (7) Tleinlí #(yan) x̣watóowu
almost #(CMPL=) PFV.1SG.S.read.C
wé x'úx'.
that book
"I almost finished reading that whole
book." (SJ)

Yan adds... endpoint of a scale?

- (9) Yan dax wudzi.át'
CMPL= DSTR= PFV.MID.cool
xáa sá!
looks.like
“Look like they’re cooled off!” (SJ)

1. What's that *yan*?
2. *Yan* and *completely*: Maximizing scales
3. *Yan* and *done*: When you've had enough
4. Summary
5. Dessert: *Yan* and pluractionality

Yan takes you to the top

- (10) Yan dax wudzi.át'.
CMPL= DSTR= PFV.MID.cool
“They’re cooled off.”

- (11) Yan xwaatóow wé x'úx'.
CMPL= PFV.1SG.S.read that book
“I read that whole book.”

- (12) Wé dzísk'w yan uwatáa.
that moose CMPL= PFV.fat
“That moose is fattened up.”

(13) The cookies cooled.

(14) The cookies cooled **completely**.

Kennedy and Levin (2008) (approximately):

$\llbracket \text{completely} \rrbracket =$

$$\lambda g_{\text{change scale}} \cdot \lambda x_{\text{entity}} \cdot \lambda e_{\text{event}} \cdot g(x)(e) = \max(g)$$

Completely with incremental themes

I didn't read the book.

I ?(?didn't) read the book.

I read the book.

Completely with incremental themes

I didn't read the book.

I didn't read the book **completely**.

I ?(?didn't) read the book.

I didn't read the book **completely**.

I read the book.

I read the book **completely**.

Completely with incremental themes

I didn't read the book.

I didn't read the book **completely**.

I **?(?didn't)** read the book.

I didn't read the book **completely**.

I read the book.

I read the book **completely**.

Kennedy (2012) and Henderson (2012) extend Kennedy and Levin (2008) to direct object scales, and we can use that here.

I read the book.
 $\underline{\text{X}}$ waatóow wé x'úx'.

I read the book *completely*.
Yan $\underline{\text{x}}$ waatoow we x'ux'.

$$\llbracket \text{yan} \rrbracket = \llbracket \text{completely} \rrbracket = \\ \lambda g_{\text{change scale}} \cdot \lambda x_{\text{entity}} \cdot \lambda e_{\text{event}} \cdot g(x)(e) = \max(g)$$

- Impossible with other measures of change.
- Obligatory narrow scope with respect to “all”. (Borne out!)

Depending on implementation:

- Can('t) be used if the event is impossible to continue, even if not at the top of the scale.

1. What's that *yan*?
2. *Yan* and *completely*: Maximizing scales
3. *Yan* and *done*: When you've had enough
4. Summary
5. Dessert: *Yan* and pluractionality

Yan when you don't feel like continuing

- (15) Yan x̣waditúw.
CMPL= PFV.1SG.S.APSV.read
“I’m finished reading.” (SJ)
- (16) Aaa, dé tléinlí yan x̣’a_xwaataaní.
yes now almost CMPL= PFV.1SG.S.speak.C
“Yes, I’m almost finished talking.” (SJ)
- (17) # Yan uwatáa.
CMPL= PFV.sleep
Intended: “She’s done sleeping.”

- (18) I'm done reading that book, even though I only got halfway through.
- (19) # I'm done reading that book, but I want to read more of it.
- (20) I'm done reading that book, but my mom is making me read more of it.
- (21) # The sky is done darkening.

- (18) I'm done reading that book, even though I only got halfway through.
- (19) # I'm done reading that book, but I want to read more of it.
- (20) I'm done reading that book, but my mom is making me read more of it.
- (21) # The sky is done darkening.

Tentatively: $\llbracket \text{done} \rrbracket =$
 $\lambda F_{\text{predicate}} \cdot \lambda x_{\text{entity}} \cdot \lambda e_{\text{event}} \cdot \text{the desire of } x \text{ for } F(x)(e) \text{ is fully satisfied}$

(15) Yan xwaditúw.

CMPL= PFV.1SG.S.APSV.read

“I’m finished reading.”

(SJ)

- (15) Yan xwaditúw.
CMPL= PFV.1SG.S.APSV.read
“I’m finished reading.” (SJ)

Tentatively: $\llbracket v' \rrbracket =$

$\lambda x_{\text{entity}}. \lambda e_{\text{event}}.$ the degree to which e satisfies x 's desire to read

Yan satisfies agent desire

- (15) Yan xwaditúw.

$\llbracket yan \rrbracket =$

$\lambda g_{\text{change scale}}. \lambda x_{\text{entity}}. \lambda e_{\text{event}}. g(x)(e) = \max(g)$

Yan satisfies agent desire

- (15) Yan \underline{x} waditúw.
CMPL= PFV.1SG.S.APSV.read
“I’m finished reading.” (SJ)

Tentatively: $\llbracket v' \rrbracket =$

$\lambda x_{\text{entity}}. \lambda e_{\text{event}}.$ the degree to which e satisfies x 's desire to read

$\llbracket yan \rrbracket =$

$\lambda g_{\text{change scale}}. \lambda x_{\text{entity}}. \lambda e_{\text{event}}. g(x)(e) = \max(g)$

$\llbracket yan v' \rrbracket =$

$\lambda x_{\text{entity}}. \lambda e_{\text{event}}.$ the degree to which e satisfies x 's desire to read is
the biggest amount of satisfaction

Agent desire scale only as a last resort

- (22) # Wé x'úx' **yan** x̣waatúw.
that book **CMPL=** PFV.1SG.S.read
Intended: "I'm done reading that
book [don't want to continue]."
→ *You don't like it but you still
finished reading it, that's what
you're saying. - SJ*

- (23) # **Yan** x̣waax̣áa wé gáx̣
CMPL= PFV.1SG.S.eat that rabbit
atx̣aayí.
food
Intended: "I'm done eating my
salad [don't want to continue]."

Done is opportunistic too (to a point)

- (24) When the rocks are **done** tumbling, I'll show them to you.
- (25) When the fence is **done** rusting, I'll paint the porch to match it.
- (26) # When the fence is **done** rusting, it'll crumble away.

When no scale available, conjure one from context

(24) When the rocks are **done** tumbling, I'll show them to you.

(24) When the rocks are **done** tumbling, I'll show them to you.

$$\llbracket done \rrbracket = \llbracket completely \rrbracket = \llbracket yan \rrbracket = \\ \lambda g_{\text{change scale}} \cdot \lambda x_{\text{entity}} \cdot \lambda e_{\text{event}} \cdot g(x)(e) = \max(g)$$

When no scale available, conjure one from context

(24) When the rocks are **done** tumbling, I'll show them to you.

$$\llbracket done \rrbracket = \llbracket completely \rrbracket = \llbracket yan \rrbracket = \\ \lambda g_{\text{change scale}}. \lambda x_{\text{entity}}. \lambda e_{\text{event}}. g(x)(e) = \max(g)$$

$$\llbracket \langle \text{enough} \rangle \rrbracket_{x_0} = \\ \lambda P_{\text{predicate}}. \lambda x_{\text{entity}}. \lambda e_{\text{event}}. \text{the degree to which } e \text{ satisfies } x_0 \text{'s} \\ \text{desire for } F(x)(e)$$

When no scale available, conjure one from context

(24) When the rocks are **done** tumbling, I'll show them to you.

$$\llbracket done \rrbracket = \llbracket completely \rrbracket = \llbracket yan \rrbracket = \\ \lambda g_{change\ scale} . \lambda x_{entity} . \lambda e_{event} . g(x)(e) = \max(g)$$

$$\llbracket \langle enough \rangle \rrbracket_{x_0} = \\ \lambda P_{predicate} . \lambda x_{entity} . \lambda e_{event} . \text{the degree to which } e \text{ satisfies } x_0 \text{'s} \\ \text{desire for } F(x)(e)$$

$$\llbracket done [\langle enough \rangle v'] \rrbracket_{x_0} = \\ \lambda x_{entity} . \lambda e_{event} . \text{the degree to which } e \text{ satisfies } x_0 \text{'s desire for the} \\ \text{rocks to tumble is the biggest amount of satisfaction}$$

When no scale available, conjure one from context

- (15) **Yan** \underline{x} waditúw.
CMPL = PFV.1SG.S.APSV.read
“I’m finished reading.” (SJ)

$$\llbracket done \rrbracket = \llbracket completely \rrbracket = \llbracket yan \rrbracket = \\ \lambda g_{\text{change scale}} \cdot \lambda x_{\text{entity}} \cdot \lambda e_{\text{event}} \cdot g(x)(e) = \max(g)$$

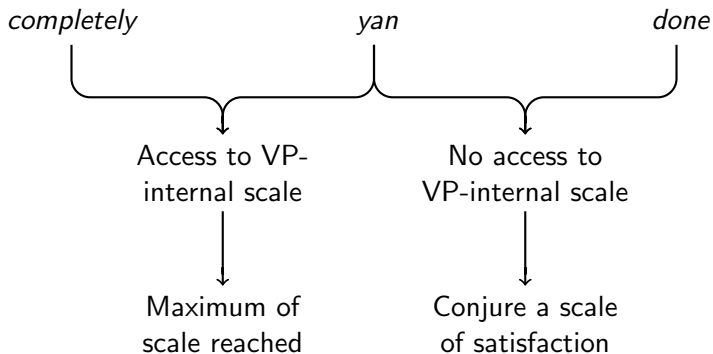

$$\llbracket \langle \text{enough} \rangle \rrbracket_{x_0} = \\ \lambda P_{\text{predicate}} \cdot \lambda x_{\text{entity}} \cdot \lambda e_{\text{event}} \cdot \text{the degree to which } e \text{ satisfies } x_0 \text{'s} \\ \text{desire for } F(x)(e)$$

$$\llbracket yan [\langle \text{enough} \rangle v'] \rrbracket_{x_0} = \\ \lambda x_{\text{entity}} \cdot \lambda e_{\text{event}} \cdot \text{the degree to which } e \text{ satisfies } x_0 \text{'s desire for } x \text{ to} \\ \text{read is the biggest amount of satisfaction}$$

- Can grab implicit causers or evaluators from context if need be.
- When VP doesn't contain a scale, incompatible with explicit denial of agent desire.

1. What's that *yan*?
2. *Yan* and *completely*: Maximizing scales
3. *Yan* and *done*: When you've had enough
4. Summary
5. Dessert: *Yan* and pluractionality

Summary

Acknowledgments

This work was supported by the Fonds de Recherche du Québec and the Jacobs Research Fund / Kincade Language Fund.

Thank you to James Crippen, Seth Cable, Luis Alonso-Ovalle, and the McGill Syn-Sem reading group for innumerable helpful comments.

Thank you to Alex Ito, Fiona Smith, and Phoenix Gee-Benwell for data help.

Thank you and *aatlein gunalchéesh* to my consultants *Anyàtashâsh* Sam Johnston and *Shuwuteen* Margaret Bob.

1. What's that *yan*?
2. *Yan* and *completely*: Maximizing scales
3. *Yan* and *done*: When you've had enough
4. Summary
5. Dessert: *Yan* and pluractionality

- (16) Aaa, dé tléinlí yan x̣'ax̣waataaní.
yes now almost CMPL= PFV.1SG.S.speak.C
“Yes, I’m almost finished talking.”

(SJ)

- (16) Aaa, dé tléinlí **yan** x̣'ax̣waataaní.
yes now almost **CMPL=** PFV.1SG.S.speak.C
“Yes, I’m almost finished talking.” (SJ)

That verb for *speak* often goes with a certain pluractional suffix, so I tried that with *yan*...

- (27) # Aaa, dé tléinlí yan yoo
yes now almost CMPL= ALT=
x'axwaatángi.
PFV.1SG.S.speak.PLURAC.C

Intended: “Yes, I’m almost finished talking.”

→ *Almost like he’s losing his speech or losing his voice or whatever.* - SJ

Measuring events

- Events aren't inherently individuated (see e.g. Kratzer, 2008).
- Pluractionals can impose an axis by which to measure them (Henderson, 2012; Lasersohn, 1994; Ojeda, 1998).

Pluractional provides scale of event counting

- (27) # Aaa, dé tléinlí yan yoo
yes now almost CMPL= ALT=
x'axwaatángi.

PFV.1SG.S.speak.PLURAC.C

Intended: "Yes, I'm almost finished talking."

→ *Almost like he's losing his speech or losing his voice or whatever. - SJ*

- (27) # Aaa, dé tléinlí *yan* yoo
yes now almost **CMPL=** ALT=
x'axwaatángi.
PFV.1SG.S.speak.**PLURAC.C**
Intended: “Yes, I’m almost finished talking.”
→ *Almost like he’s losing his speech or losing his voice
or whatever. - SJ*

Paraphrase: *I have almost spoken the maximum number of
speaking events for me.*
